

Delon Pyle

ASSISTANT ICT ENGINEER

Professional Summary

I build digital systems for Guyana's public sector and growing economy: Assistant ICT Engineer at the National Data Management Authority, and founder of AutoBid GY, a vehicle marketplace for which I built the mobile app, backend and website. 3+ years building applications on the Frappe Framework and FlutterFlow, in Python, JavaScript and SQL, with systems connected through REST APIs. Completing a BSc in IT (network administration and technology development) and working toward Senior ICT Engineer.

Employment History

Founder & Developer, AutoBid GY, Guyana

2026 — PRESENT

- Founded a mobile marketplace and auction platform for buying and selling vehicles.
- Built the iOS and Android app, the backend and APIs, and the autobid.gy website.

Assistant ICT Engineer, National Data Management Authority (NDMA), Georgetown

NOV 2025 — PRESENT

- Support and develop the systems behind Guyana's national data services.
- Use AI tools and prompt engineering in day-to-day engineering work.

Associate Developer, National Data Management Authority (NDMA), Georgetown

NOV 2023 — NOV 2025

- Built business applications on Frappe Framework versions 13–15, including custom client scripts.
- Developed mobile applications with FlutterFlow.
- Contributed code through Git and GitLab, working in Python, JavaScript, HTML and CSS.

Trainee Testing and Customization Assistant, Guiana Holdings Inc., Georgetown

AUG 2024 — SEPT 2024

- Checked and validated the functionality and quality of games to identify bugs and glitches.
- Tested all levels and aspects of a game, including the accuracy of information being populated.
- Stress-tested game settings to check system stability under varying load.
